TO: File
FROM: Richard B. Hall, Distribution Engineer
SUBJECT: Field Examination of the Big Sand Wash Distribution System
DATE: September 14, 1984

A field examination of the subject system was undertaken on September 13, 1984, with the following in attendance:

Bill Christensen
Edward D. Feldt

Richard B. Hall
Jerry L. Bronicel

The following items were observed:

- 1) The measuring devices in the ditches are in satisfactory condition.
- 2) The parshall flume immediately below the dam is not accurate because the upstream velocities are way to high.
- 3) The system has several small rights immediately upstream of the reservoir.
